

10/6/11

12:50
Lecture

Photograph vs. Snapshot

- elements of a high quality photo: focus, movement, balance
- attention to detail

- can be taken of anything & of varying quality (composition, exposure etc.)
- quick rough capture to document scene or event
- don't take time to prepare shot

"Mindful Photography"

- Snapshot - "a photograph that is 'shot' spontaneously & quickly without artistic or journalistic intent."
- Mindfulness - being observant, attentive, careful, deliberate, focused in the moment.
- Mindful Photography - Photographer & the process, not the gear that makes a 'great photo.'
- Knowing when NOT to take a photo (think about timing/setting)

1:20-1:55

Brainstorm papers:

Your evidence of intent:
2 pages (1 for tree project, one for ghost)
